

Gallons of Finished Solution

Finished Solution	100	300	600	900
Gallons of Water	30	90	180	270
E3Expander™ Fertilizer Formula	1/3 Gallon	1 Gallon	2 Gallons	3 Gallons
Liquid Fertilizer/Nitrogen	70*	210*	420*	630*

*Achieves 30% chemical reduction.

In-furrow Fertilizer Application Formula Directions

Always read and follow all directions

1. Make sure tank is clean and completely flushed.
2. Consult chart above when mixing fertilizer.
3. Mix E3Expander™ and required amount of water first. Consult chart above to determine the water necessary.
4. Once E3Expander™ and water are fully mixed by agitation/recirculation, add liquid fertilizer while continuing to agitate/recirculate. Consult chart above to determine the amount of liquid fertilizer/nitrogen.
5. Do not reduce application rate for in-furrow application as E3Expander™ Fertilizer Formula applied in-furrow is designed to hold in-furrow fertilizer in place longer.
6. E3Expander™ Fertilizer Application Formula in solution will appear nearly clear.
7. Do not breathe mist.
